HOW TO SAFELY DISPOSE OF UNUSED AND EXPIRED MEDICATIONS

- 01** Take advantage of drug take back locations in your local community.
- 02** Check instructions on package; if flushing is allowed, do so.
- 03** Mix medicines (liquid or pills; do not crush tablets or capsules) with unappealing substance such as dirt, cat litter or used coffee grounds.
- 04** Place the mixture in a container such as a plastic bag and throw it away in your trash at home.
- 05** Delete all personal information on the original container and then trash or recycle the empty container.
